Problem Statement:

Sometimes in our life we need jobs for money or experience. We want to do jobs in more than one company for gathering experience or money . On the other hand companies need people for their minor works. So we need a connection between job seeker and job giver.

For solving this problem, our website will be very helpful.

Problem Objective:

The main objective of the project is to change the manual way of operation of the job application to the automatic system. Also, this system will be a breakthrough for freelancing job market in Bangladesh.
